Dipolo magnetico

2/6/21 12:52 PM

IDEALE se

spira : $S \to 0$ $\quad m = I S \vec{u}_n = \overline{cost}$

FORZA:

$$F = m \cdot \overline{\nabla B}$$

$F = 0$ se B uniforme

MOMENTO (se B uniforme)

$$\tau = \overline{m} \times \overline{B}$$

ENERGIA

$$U = - \overline{m} \cdot \overline{B}$$

CAMPO

$$B = - \frac{\mu_0}{4\pi} \nabla \left(\frac{\overline{m} \cdot \overline{r}}{r^3} \right)$$
